LiveToRock

Traigh Scott, Jacob Clark, Cass Alcorn, Kc Weaver

Team and Project

Traigh Scott: Game design concentration

Cass Alcorn: Cybersecurity concentration

Kc Weaver: Game design concentration

Jacob Clark: General CS/Undeclared concentration

Client and LiveToRock:

Michael

Former Ball State Student, currently residing in Georgia. Music has always been a big part of his life. Got into pharmaceuticals, specifically relating to cancer patients. Started another non-profit before this.

Feedback

Mentor Feedback:

…

Client Feedback:

"Comment and liking looks good! The video approval through an email is right on the money with what I was looking for!" Overall very appreciative of our work on the project thus far. Clarified that the calendar and merch page are the next big parts of the website to get running. Then, the smaller stuff like podcasts and such will be whatever we can get too with the time left.

Iteration 2 Features

Liking and Commenting on blog posts.

Admin page with video approval system.

Iteration 4 Plans

Tour Schedule will have events listed on it with descriptions

Verified Users can love posts

Filter for comments and forum

Merch page / Print on Demand

Who Dids Whats

Traigh Scott: I worked on formatting the delete button to be under the videos shown, then I worked on refactoring our code for LifePerformance and JamSession. I also helped with trying to figure out testing, however, that is still in progress.

Cass Alcorn: I worked entirely on trying to implement testing and code coverage this iteration

Kc Weaver: Created approve and deny buttons for the life performances plugin

Jacob Clark: Primarily did the likes and comments for the Jam Session Blog
